

Call for Applications

The International Space University seeks a dynamic, experienced individual for President

Founded in 1987, the International Space University (ISU) is the world's leading private, non-profit institution of higher education, dedicated to the development of space for peaceful purposes through international, intercultural, and interdisciplinary education and research programs. ISU offers a variety of programs including a central campus based Master of Space Studies, its Space Studies Program--a two-month professional development program that has convened every Summer since 1988 at various locations around the world--a one-month Southern Hemisphere Space Studies Program--held annually in Australia--as well as Executive Education Programs held in various countries.

The ISU central campus and global headquarters are located near Strasbourg, France. For more information, please visit the ISU website at www.isunet.edu.

The Board of Trustees will appoint a successor to the current acting ISU President to take up their duties at an agreed date no later than September 2024--depending on arrangements to be made with the selected candidate.

Qualifications

The ideal candidate shall be an entrepreneurial, strategic, and inspirational leader with demonstrated success managing an international, multidisciplinary organization. Applicants shall have proven operational experience at a senior level in an academic institution and demonstrable knowledge of academic processes and procedures. They shall also have experience in development and fundraising to ensure that the resources which allow ISU to achieve ever-higher levels of excellence can be secured. Applicants should be well-reputed with proven experience in international negotiations and exchanges. The President must also be an effective communicator and a forceful advocate for ISU and its values.

Applicants must be fluent in English with proficiency in French considered an asset. It is strongly desired that candidates have good knowledge of the space enterprise and related areas.

Application Information

Interested applicants are requested to send their cover letter and C.V. to executive.office@isunet.edu. For maximum consideration, applications should be received by 25 February 2024.

The International Space University is an equal opportunity employer dedicated to diversity, equality, and inclusion in the workplace. All qualified applicants will receive consideration for employment without regard to gender, religion, national origin, disability status, or any other characteristic protected by law.
