

International Space University Announces Strasbourg as Host for the Space Studies Program 2026

Strasbourg, France – The International Space University (ISU) is pleased to announce that the Space Studies Program (SSP) 2026 will be hosted at ISU's Central Campus in Strasbourg, France. This decision marks a pivotal step in ISU's new strategic vision, MOON SHOT 2030, reinforcing the university's position as a global leader in space education and a key resource in the evolving New Space Economy.

Since its inception in 1988, the SSP has brought together future leaders of the space sector, offering an immersive, interdisciplinary, and international learning experience. With SSP 2026 returning to ISU's headquarters, participants will have a unique opportunity to engage directly with ISU's faculty, research initiatives, and global network while benefiting from the university's well-established facilities and space ecosystem in Strasbourg, France.

ISU Central Campus, Strasbourg, FRANCE

"Hosting SSP 2026 at our Central Campus is an exciting milestone for ISU," said Dr. John Wensveen, President of ISU. "This decision aligns with our long-term vision to strengthen ISU's role as a central hub for global space education and innovation. SSP26 will not only bring together participants from around the world but also serve as a launchpad for the next phase of development, strengthening the program's future impact."

SSP 2026 will set the stage for the evolution of the program, ensuring that it remains at the forefront of space education and workforce development. The experience will allow participants to engage with renowned experts, cutting-edge research, and the broader space community while immersing themselves in the dynamic space industry of Europe.

As part of ISU's commitment to expanding global collaborations, all proposals submitted for hosting the SSP 2026 selection process will be considered for future editions, including SSP 2027 and SSP 2028. ISU remains dedicated to fostering partnerships with institutions and organizations worldwide to bring space education to new regions.
